Hatco has the perfect food warmer for holding boxed or bagged pizzas with the Glo-Ray® Pizza Warmer.

FLEXIBILITY

The Hatco Glo-Ray GRPWS series allows the operator to keep pizza hot and fresh for convenient self-serve or quick-serve areas. These warmers are available in base only, dual, triple, or quadruple shelf models. Choose any combination of three widths and two depths.

All models are constructed of aluminum and stainless steel with tempered glass side panels; and feature slanted, heated, hardcoated aluminum shelves with stainless steel box stops for easy pass-through holding, sign holders, and 4" (102 mm) legs.

Each heat zone has a separate on-off switch and temperature control to accommodate a variety of pizzas. Bright annealed lamp reflectors with incandescent display lights illuminate the holding areas and emphasize product.

QUALITY

The following features assure the finest performance for years to come:

- All models have thermostatically- controlled base heat to maintain optimum serving temperatures.
- A separate on-off switch and temperature control for each heat zone allows for the holding of a variety of pizzas.
- Available in base only, dual, triple, and quadruple shelves with various widths and depths.
- Coated shatter-resistant incandescent lights enhance product display while safe-guarding food products from bulb breakage.
