## LISTINGS:

This hood is ETL Listed to Standard UL-710B and EPA test method 202 when installed in accordance with these installation instructions and National Fire Protection Association Standard "NFPA 96, Standard for Ventilation Control and Fire Protection of Commercial Cooking Operations."

This product is not provided with an integral fire extinguishing system. Authorities having jurisdiction should be consulted as to the requirement for this equipment with respect to fire extinguishing systems, such as the need for a field installed system in accordance with NFPA 96.

This hood is NSF Certified to NSF/ANSI Standard 2.

## INSTALLATION REQUIREMENTS:

The KA7EVH ventless hood must be interlocked with oven using hood kit accessory, or stacking kit accessory.

## CLEARANCES:

- 18" to ceiling.
- Allow adequate left side clearance to access filters in hood.
- Rotisserie may require right side clearances for plumbing connections. See KA7E specifications.

As continued product improvement is a policy of Hobart, specifications are subject to change without notice.
