

WHEN IT COMES TO HANDWASHING, TIME AND WATER IS MONEY.

INSTALL THE INSTANT WARM HANDWASHING SYSTEM THAT PAYS FOR ITSELF IN AS FEW AS 45 DAYS.*

The average QSR kitchen completes 78,000 hand washing sessions per year. By installing the Instant Warm Handwash System you can:

**Save ≈ 40,000 gallons
of water per year**

**Improve labor
productivity by
≈ \$6,000 per year**

**Comply with FDA and
ServSafe health codes**

COST-EFFECTIVE INSTALLATION WITH MINIMAL REQUIREMENTS.

The Instant Warm Handwash System is a touchfree handwashing solution that provides 100-degree water instantly. The system combines a hot water tank and touchless faucet in one space-saving system that can be placed in numerous locations. All that's required is a sink, cold water line, and a 115-volt outlet. The patented faucet design seamlessly covers both deck and splash mount options.
